PROJECTS

TrumpTweet

A web app that pulls from the Twitter API using Angular, jQuery, Bootstrap, and Angular routing to add the ability to provide deep links.

Breakout Game

A simple breakout game made with Canvas and Javascript. Some of difficulties included the movement of the ball, collision detection, and increasing the difficulty at a reasonable pace.

Weather App

An application that pulls information from the OpenWeatherMap API and draws it in the browser with Canvas. Uses some Javascript to change aspects depending on the current weather.

EDUCATION

DigitalCrafts

16 Week Immersive Bootcamp
October 2015 - February 2016

Covers fullstack web development by teaching basic front-end web development, advanced front-end web development, JavaScript and the MEAN stack, as well as PHP and the LAMP stack.

University of North Georgia

Associate's Degree in Business Administration
January 2011- May 2014

EXPERIENCE

My Friend's Growler Shop

2014-Present

Owner and Manager of a growing retail business located in Grant Park, Atlanta. I maintain our website, track inventory, and build relationships essential in cultivating a successful business.
